Assignment 2

by [Ayan Datta](#) - Wednesday, 14 February 2024, 1:17 PM

Hey all!

Assignment 2 on Neural POS Tagging is out now.

Please go through the assignment document carefully to find the requirements. You may reach out to the TAs regarding any concerns.

Additionally, there will be a tutorial tomorrow (15 February) from 6:30pm to 8:30pm in H205 where we will cover all the basics you will need to finish the assignment.

The topics that will be covered are:-

Intro to Deep Learning and Neural Networks

Recurrent Neural Networks

PyTorch

The prerequisites for the tutorial are:-

Python

Object Oriented Programming in Python

A basic understanding of Linear Algebra and Differential Calculus

We suggest everyone to start the as soon as possible as the assignment is heavy on training neural networks, and it is a time consuming process.

The deadline is 23 February and will not be extended owing to the mid semester examinations.

Hearty Regards,

iNLP TAs

Re: Assignment 2

by [Ayan Datta](#) - Thursday, 15 February 2024, 6:28 PM

Reminder for the Tutorial now in H205.

It is highly recommended that everyone attends the tutorial as we will be covering topics that are essential for this and the coming assignments.

by [Sriya Sriya](#) - Tuesday, 20 February 2024, 1:40 PM

Hi TAs,

As was discussed in the tutorial, the dev data set has 1 extra tag as compared to train and test data set, is it ok if we remove the words from dev data set that has that extra tag while preprocessing? Any other suggestions for dealing with this mismatch of the no of tags?

**Re: Assignment 2**

by [Ayan Datta](#) - Friday, 16 February 2024, 12:53 PM

The slides used for the tutorial have been uploaded. Please note that the link for the Python notebook used has been attached in the slides. The notebook now also contains examples for padding non-uniform length sequences to a uniform length for batching and using a custom `collate_fn`. The slides now also contain links to resources you may find helpful.

by [Shubham Kathiriy](#) - Saturday, 17 February 2024, 3:11 PM

In the dataset description part of the assignment, "Use the first, second, and fourth columns only (word index (starting from 1), lowercase word, and POS tag)." is there any special need for a word index? for training and validation, we only need word and it's pos tag, right?

by [Patanjali Bhamidipati](#) - Saturday, 17 February 2024, 4:34 PM

As long as you build your own Vocabulary and use it, the word index doesn't matter.

by [Nivesh Mittapally](#) - Saturday, 17 February 2024, 6:28 PM

Can we use the NLTK library for tokenizing the input text?

[Permalink](#) [Show parent](#) [Reply](#)

**Re: Assignment 2**

by [Patanjali Bhamidipati](#) - Saturday, 17 February 2024, 7:11 PM

Yes, you can use nltk for tokenization.

by [Kartheek Padda](#) - Sunday, 18 February 2024, 1:36 PM

Can we use Word2Vec in gensim.models for word embeddings or should we generate embeddings on our own?

[Permalink](#) [Show parent](#) [Reply](#)

**Re: Assignment 2**

by [Patanjali Bhamidipati](#) - Sunday, 18 February 2024, 8:42 PM

Yes, a small correction, you are free to use any pretrained word embeddings.

**Re: Assignment 2**

by [Sanika Damle](#) - Sunday, 18 February 2024, 10:47 PM

Which one are we supposed to use? Because if the embeddings are generated, if a random sentence is used as the input, the results will be lot different than if pretrained word embeddings are used, because the train dataset is not very diverse.

by [Rihitesh Singh](#) - Friday, 23 February 2024, 12:37 AM

In the 3.1 section of the hyperparameter tuning of ffnn, it is saying to create 3 different configs for dev set evaluation. so in that should p and s values be different? an example has been given with $p=2$ and $s=3$, so this could be one such config and one of the config should have $p=s$. and the best out of the 3 should be used for test set evaluation. is my understanding correct? also for plotting the graphs thing, it says try for context window from 0 to 4. what does it mean? context window is $(p+s+1)$ right? does it mean that for we need to plot for 5 different config each having $p = s = \{0,1,2,3,4\}$? This part is not clear. Please clarify.

Dear Sir and TAs,

This is an earnest request to ask for an extension for the assignment 2. The assignment is really hefty and is taking too much time to implement stuffs.

Given the mid sems are just round the corner, it would be really helpful if we would be granted an extension for a couple of days after the mid-sems.

With that a proper learning would also be ensured from this, if given a little more time.

Thank You.

**Re: Assignment 2**

by [Lakkireddy Reddy](#) - Friday, 23 February 2024, 8:48 AM

Dear Sir and TAs,

Assignment is challenging and give us great understanding of the concepts. However, with the mid-semester examinations approaching, many of us are finding it increasingly difficult to allocate the necessary time and focus to this assignment without compromising our study and preparation for the exams.

In light of this, I kindly request your consideration to extend the deadline for the assignment by a couple of days following the conclusion of the mid-semester examinations.

Thank You.

by [Chowdam VenkataThirumalaKumar](#) - Friday, 23 February 2024, 10:52 AM

Dear Sir and TAs,

An extension would be really helpful as we get closer to the mid-semester exams and many of us are finding it hard to focus on this assignment.

Thank you.

by [Sanya Gandhi](#) - Friday, 23 February 2024, 10:59 AM

Dear Sir and TAs,

We wish to make the best of this assignment and put in more effort than we could because of the Mid-sem exam's pressure. It be great if a little extension could be provided to work on the rest of the assignment after mid-sem. We request you to kindly consider this and extend the deadline.

Thank you!

**Re: Assignment 2**by [Srikant Konduri](#) - Friday, 23 February 2024, 11:03 AM

Dear Sir and TAs

Yes, considering mid sems and other courses it would be beneficial if an extension is given.

Thank you

[Permalink](#) [Show parent](#) [Reply](#)**Re: Assignment 2**by [Priyanshu Bansal](#) - Friday, 23 February 2024, 11:52 AM

Yes, given the midterms and other courses, an extension would be good.

[Permalink](#) [Show parent](#) [Reply](#)**Re: Assignment 2**by [Surtani Monica](#) - Friday, 23 February 2024, 11:23 AM

Respected TAs,

Working on assignment and understanding the concepts is time consuming. Since mid exams are near by, it is hard to handle both. Extension would be helpful to produce a better outcome.

Please consider our request for extension.

Thank you

[Permalink](#) [Show parent](#) [Reply](#)**Re: Assignment 2**by [Rutvik Jakhaniya](#) - Friday, 23 February 2024, 11:32 AM

Dear Sir and TAs,

Due to the upcoming mid-term exams, we find ourselves under considerable pressure and would like to request an extension for the assignment deadline. This extension would allow us to dedicate more time and effort to producing a higher-quality submission.

We kindly ask for your understanding and consideration regarding this matter.

Thank you

[Permalink](#) [Show parent](#) [Reply](#)**Re: Assignment 2**by [Mayush Kumar](#) - Friday, 23 February 2024, 11:48 AM

Dear Sir and TAs,

In the upcoming week, we have midsems and it is difficult for us to focus on assignment and fully experiment with different parameters and models. So it will be beneficial and much appreciated, if we can get deadline extended to few days after the midsems.

Thank You.

[Permalink](#) [Show parent](#) [Rep'](#)**Re: Assignment 2**by [Patanjali Bhamidipati](#) - Friday, 23 February 2024, 12:38 PM

Hello all,

We decided to push the deadline by 2 days, i.e. the new deadline is 25th February 11:59 pm. Please note that there will be no more extensions after this (not joking at all).

Kindly try finishing the assignment as soon as possible.

Warm regards,

iNLP TAs.

by [Saheli Saha](#) - Saturday, 24 February 2024, 12:33 PM

TAs,

Please update the deadline for the assignment on courses portal. The assignment submission is disabled due to overdue status.
